

3/22/21 – Introduction to Cross Sections

Essential Question:

What 2D shapes are used to make 3D shapes?

Objective:

I can explain what 2D shapes are used to make 3D shapes.

Classwork:

1. Mindset – IXL Diagnostic
2. Review vocabulary: Perpendicular, Parallel, Cone, Cylinder, Prism, Base & Vertex
3. New vocabulary: Pyramid, Cross-Section, Diagonal and Plane
4. Vantage Points

Homework:

- Finish vocabulary notes if necessary
- Locate and bring a “plane” with you tomorrow (ID card, library card, gift card, etc.)

If you are absent:

- * You will need to complete your notes
- * You will need to locate a “plane” (ID card, library card, gift card, etc.) and bring it with you on Tuesday.
